

Laser Hair Restoration Preparation Sheet

The following information will allow for you to help us to give you the best possible treatment by creating the best environment for you. Please read them thoroughly.

Hair/Scalp Condition: Please arrive for treatment with freshly washed hair. Do not apply any hair products such as freshly dyed products that may still be on the scalp, gels, hair spray, tightly weaved/braided styles, etc. You are welcome to apply skin moisturizer AFTER your treatment, if you'd like, just not before.

Medication: Please let the staff also know if you are currently taking any prescribed medication that makes you photosensitive (sensitive to high intensity light or sunlight).

Medical Condition: If you are sick, especially of a contagious type, PLEASE call and reschedule for a time you feel better. You won't be penalized for it. During current COVID restrictions we must insist that you wear a facemask that covers your mouth AND nose during your treatment. Patients without facemasks will not be eligible for receiving treatment. We want EVERYONE healthy and happy.

Music/Reading: Feel free to bring with you any music devices that you can listen to (through ear plugs) or reading material to make your treatment time more pleasurable.

Food/Beverages: Unfortunately food or beverage is not allowed during treatments.
